

Arc Chucks

Standard Adjustable Arc Chuck

Stud Diameter	Overall Length
12 gauge thru 1/2"	2-1/2"
5/8" thru 1"	3"

Standard adjustable arc chucks are used in a vast majority of stud weld guns in operation today. The tapered adaptor base is commonly known as an N taper. The chuck includes an internal adjustable stop to facilitate various stud lengths.

Long and Extra Long Arc Chucks

Stud Diameter	Overall Length
#8 thru 3/4" long	3-7/8"
#8 thru 3/4" Extra Long	4-3/4"

Long and extra long adjustable arc chucks are used in a vast majority of stud weld guns in operation today. The tapered adaptor base is commonly known as an N taper. The chuck includes an internal adjustable stop to facilitate various stud lengths. These chucks are used when deeper access is required or ferrule tubes are being used.

Head Anchor and Shear Connector Chucks

Stud Diameter	Overall Length
3/8" and 1/2" Headed Anchor	3-1/2"
5/8" and 3/4" Shear Connector	3-1/4"
7/8" and 1" Shear Connector	3-1/4"

Headed anchor and shear connector chucks are used in a vast majority of stud weld guns in operation today. The tapered adaptor base on the 1/2" chuck is commonly known as an N taper. The Shear Connector chucks are designed to be attached directly to the connector stud with 1/2-20 thread. The chuck includes an internal adjustable stop to facilitate various stud lengths. The chuck tines are replaceable if worn or arced, thus reducing the cost of chuck replacement. Also available in 45 and 90 degree versions for welding bent studs.
