

TK 2n1 Crimper Bearer

The Tin Kocker 2n1 Crimper Bearer is a machine that is light weight and can perform both beading and crimping. This manual hand cranked machine is portable and works great in the field for the insulation trade where light gauge materials are used.

FEATURES

- Performs both beading and crimping operations with one setup.
- No tools are needed for setups.
- Both bead and crimp have markable surfaces to assist the operator in repeating setups.
- Either 1/8 inch or 1/4-inch bead sizes are available.
- The unit allows the head to be positioned as desired to the preference of the operator.
- Easily portable for job site use.
