

## Insulation Washers

Insulation Washers, commonly referred to as speed clips, are used with a variety of insulation fasteners. They are most commonly manufactured with 10, 12 and 14 gauge holes to accommodate the most widely used insulation pins. We also stock them with non standard size holes to be used with threaded fasteners, larger pins and other fastener holding applications. We can custom size them for your requirements.

- Washers are available in mild steel, stainless steel and aluminum.
- We offer a variety of sizes and shapes-round, square and rectangular.
- Washers are .016 thick.
- Domed cap washers options include aluminum, stainless or bi-metallic.
- Domed cap washers are available with plain or painted finishes by special order.
